FOR INTERNAL PLANNING

Instagram Competitive Intelligence Report

Creative strategy analysis for **Groww**

Target: @zerodhaonline, @angelone, @upstox.pro Period: 30 Days Format: Reels

Generated: Jun 11, 2026

Executive Summary

1. Competitors are winning by lowering the intimidation barrier around finance education.

WHY IT MATTERS

Beginner investors engage more when financial concepts are introduced through familiar daily-life situations rather than institutional jargon.

RECOMMENDED ACTION

Build recurring reel formats around relatable Groww use cases like salary day, SIP dates, and office routines.

2. Contradiction hooks are driving the highest relative view velocity.

WHY IT MATTERS

The tension between expected market behavior and actual outcomes creates a curiosity gap that forces retention through the explanation.

RECOMMENDED ACTION

INTERNAL STRATEGY DOCUMENT6/11/2026

INSTAGRAM CREATIVE INTELLIGENCE

3. Hinglish meme-native formats face less scroll resistance.

WHY IT MATTERS

Audiences consume Instagram for entertainment first. Hiding a finance lesson inside a familiar meme format increases shareability.

RECOMMENDED ACTION

Use soft humor in the first 3 seconds, but pivot to clear, brand-safe Groww UI walk-throughs for the payoff.

INSTAGRAM CREATIVE INTELLIGENCE

COMPETITORS ANALYZED 3 Accounts generating relevant overlap.	POSTS SCANNED 9 Total content universe reviewed.
REELS ANALYZED 5 Top outliers isolated for strategy.	HIGHEST VIEW COUNT 9.7k Ceiling for viral reach in this niche.
BEST CREATIVE SCORE 49.14 Indicates strongest hook-message fit.	AVG CREATIVE SCORE 41.49 Baseline quality of competitor content.
TOP ENGAGEMENT RATE 11.7% Highest community interaction found.	DOMINANT PATTERN Everyday analogy turns an abstract finance idea into a memory shortcut Most frequent winning creative strategy.

INSTAGRAM CREATIVE INTELLIGENCE

Everyday-life framing beats technical education

HIGH CONFIDENCE

Evidence: Seen in 2 top posts

BUSINESS IMPLICATION

Content that feels like 'studying' gets scrolled past. Content that feels like 'my life' gets saved.

RECOMMENDED RESPONSE

Anchor every educational script in a specific physical scenario (e.g., Metro commute, group chat).

Self-aware investing mistakes build trust

HIGH CONFIDENCE

Evidence: Seen in 2 top posts

BUSINESS IMPLICATION

Retail investors feel shame about market losses. Acknowledging common behavioral mistakes calmly reduces this anxiety.

RECOMMENDED RESPONSE

Create a 'Money Mistakes' series that normalizes the error before providing the checklist solution.

INSTAGRAM CREATIVE INTELLIGENCE

Evidence: Seen in 1 top posts

BUSINESS IMPLICATION

Broad claims about 'India's growth' feel abstract. Viewers need to see how it affects their immediate wallet.

RECOMMENDED RESPONSE

Always pair macro economic news with a specific action item for the retail investor's portfolio.

Visual pacing must match cognitive load

HIGH CONFIDENCE

Evidence: Seen in 4 top posts

BUSINESS IMPLICATION

Dense charts combined with fast talking causes drop-off. Complex topics require slower visual pacing.

RECOMMENDED RESPONSE

Use simple analogy props (jars, pizza slices) instead of screen-recorded line charts for beginner topics.

INSTAGRAM CREATIVE INTELLIGENCE

Creative Pattern Analysis

INSTAGRAM CREATIVE INTELLIGENCE

shortcut

REPLICABILITY

STRATEGIC ROLE

Acts as an attention anchor. It lowers the barrier to entry by using familiar contexts before delivering financial payloads.

AUDIENCE PSYCHOLOGY

Young beginner investors often avoid concepts that feel textbook-like or intimidating. A familiar scene—gym, food, weather, cricket, metro, group project—lowers cognitive load and creates an instant “I get it” moment. The unexpected mapping makes people stop, the simplicity keeps them watching, and the memory hook makes the post more shareable with friends who are also learning investing basics.

GROWW ADAPTATION STRATEGY

Implement this pattern using relatable creator-led skits. Use everyday Indian moments (UPI payments, group chat stock tips) as the hook, transitioning into a clear, branded UI walkthrough. Avoid overly complex charts.

INSTAGRAM CREATIVE INTELLIGENCE

exception

REPLICABILITY

STRATEGIC ROLE

Acts as an attention anchor. It lowers the barrier to entry by using familiar contexts before delivering financial payloads.

AUDIENCE PSYCHOLOGY

People stop when content says, "You thought X, but Y happened." This creates a knowledge gap without needing fear or hype. For Groww's audience, contradictions like "markets rose after bad news" or "SIP still looks negative" trigger curiosity because they challenge beginner rules of thumb. If explained calmly in plain language, the format builds trust, saves, and comments because viewers feel they have learned a nuance others may miss.

GROWW ADAPTATION STRATEGY

Implement this pattern using relatable creator-led skits. Use everyday Indian moments (UPI payments, group chat stock tips) as the hook, transitioning into a clear, branded UI walkthrough. Avoid overly complex charts.

INSTAGRAM CREATIVE INTELLIGENCE

REPLICABILITY

to young investors

STRATEGIC ROLE

Acts as an attention anchor. It lowers the barrier to entry by using familiar contexts before delivering financial payloads.

AUDIENCE PSYCHOLOGY

Large macro stories work when they connect identity, optimism, and long-term relevance. Young Indian investors are likely to pause for content that explains India’s growth, demographic shifts, or economic milestones because it makes investing feel connected to their own future. The trust trigger comes from clean data, historical anchors, and balanced language that avoids promising returns.

GROWW ADAPTATION STRATEGY

Implement this pattern using relatable creator-led skits. Use everyday Indian moments (UPI payments, group chat stock tips) as the hook, transitioning into a clear, branded UI walkthrough. Avoid overly complex charts.

INSTAGRAM CREATIVE INTELLIGENCE

STRATEGIC ROLE

Acts as an attention anchor. It lowers the barrier to entry by using familiar contexts before delivering financial payloads.

AUDIENCE PSYCHOLOGY

A concrete pain point such as "Where do I see my SIP?", "Why is my return different?", or "How do I download a statement?" attracts high-intent viewers because it solves an immediate problem. Showing the actual screen reduces uncertainty and builds confidence. These posts may not always go broadly viral, but they can drive saves, trust, and product familiarity because the viewer can act on the information right away.

GROWW ADAPTATION STRATEGY

Implement this pattern using relatable creator-led skits. Use everyday Indian moments (UPI payments, group chat stock tips) as the hook, transitioning into a clear, branded UI walkthrough. Avoid overly complex charts.

INSTAGRAM CREATIVE INTELLIGENCE

shaming

REPLICABILITY

STRATEGIC ROLE

Acts as an attention anchor. It lowers the barrier to entry by using familiar contexts before delivering financial payloads.

AUDIENCE PSYCHOLOGY

Audiences engage with content that reflects their own behavior—chasing trends, panic-checking portfolios, copying friends, or feeling FOMO—because recognition creates emotional relief. Humor makes the lesson feel safe instead of preachy. The strongest version pairs the joke with one calming takeaway, so viewers feel understood and slightly wiser, making it shareable in peer groups.

GROWW ADAPTATION STRATEGY

Implement this pattern using relatable creator-led skits. Use everyday Indian moments (UPI payments, group chat stock tips) as the hook, transitioning into a clear, branded UI walkthrough. Avoid overly complex charts.

INSTAGRAM CREATIVE INTELLIGENCE

STRATEGIC ROLE

Acts as an attention anchor. It lowers the barrier to entry by using familiar contexts before delivering financial payloads.

AUDIENCE PSYCHOLOGY

Beginner finance content performs better when viewers can understand the idea even before processing all the words. Symbols like bull/bear, rising charts, falling gold prices, app screens, or a personified portfolio act as visual anchors. This improves thumb-stopping power, retention, and recall because the viewer is not forced to decode multiple abstract ideas at once.

GROWW ADAPTATION STRATEGY

Implement this pattern using relatable creator-led skits. Use everyday Indian moments (UPI payments, group chat stock tips) as the hook, transitioning into a clear, branded UI walkthrough. Avoid overly complex charts.

Competitor Breakdown

INSTAGRAM CREATIVE INTELLIGENCE

@@upstox.pro

FOLLOWERS	AVG VIEWS	BEST SCORE
320,799	3.8k	49.14/100

CONTENT STRENGTHS

- Strong initial visual hooks (fast cuts, bold text).
- Effective use of meme formats and trending audio.

CONTENT WEAKNESSES

- Lacks deep educational payoff after the hook.
- Overly sales-focused CTAs in captions.

What to Borrow

Their ability to simplify complex topics into 3-step checklists. The pacing of their first 3 seconds is optimal for retention.

What to Avoid

The aggressive product-pushing at the end of every video, which erodes trust.

INSTAGRAM CREATIVE INTELLIGENCE

CREATIVE	ACCOUNT	SCORE	VIEWS	HOOK & STRATEGY
	@upstox.pro	49.14	7.1k 4.2% ER	CREATIVE HOOK ""Wrong gym partner❌ Right market lesson✅" / "भाई जरा सपोर्ट देना..." Type: Contrast + absurd visual metaphor. The caption sets up a wrong-vs-right frame, while the opening visual creates curiosity by placing bull and bear market symbols inside a gym bench-press scenario. STRATEGIC INTERPRETATION The reel overperformed its baseline with 1.89x relative views and a 4.18% engagement rate because it packaged a familiar stock-market concept in an unexpected setting. The caption creates an immediate wrong/right contrast, the transcript provides a Hindi punchline, and the frames use strong symbolic characters—bull, bear, bench press, and 'Bear Minimum'—to make the joke visually understandable. What is known: the post relies on humor, AI-styled novelty, and market wordplay. What is uncertain: exact audience sentiment, because comment text is unavailable, and later frames after 25s were not available for analysis. ✔ BRAND IMPLICATION Groww can adapt the underlying mechanism—everyday metaphor + beginner market lesson—without copying the bull/bear gym skit. For Groww's simple, trustworthy, beginner-friendly tone, use a calmer relatable scene such as a cricket fielder, metro queue, group project, or chai stall to explain one beginner concept at a time. Avoid trader-heavy jargon and aggressive CTAs. Example: explain 'market ups and downs' through monsoon weather, or 'diversification' through not putting all snacks in one tiffin. Keep the joke light, add one plain-language takeaway on-screen, and end with a reassurance rather than a trading punchline.
	@angelone	47.11	9.7k 3.5% ER	CREATIVE HOOK ""In 1988, India, China and Brazil had roughly the same economy."" Type: historical comparison + national progress curiosity gap STRATEGIC INTERPRETATION The reel likely overperformed on views because it combines a broad national-interest topic with investor-relevant macro context. The 2.33x relative views indicate the subject and format attracted more attention than usual for the account, while the 3.51% engagement rate is moderate and the 2 comments show limited discussion. The creative mechanism is strong: a specific historical hook, visible data progression, recognizable milestones like 1991 liberalisation and India overtaking the UK, and a hopeful but not overly promotional ending. The caption adds another layer with median-age comparisons, strengthening the long-term compounding argument. What is uncertain: actual saves, shares, retention, and comment sentiment are unavailable, so performance drivers are inferred from views, engagement rate, transcript, and visible frames. ✔ BRAND IMPLICATION Groww can adapt the pattern by making macro trends beginner-friendly and directly relevant to young Indian investors without implying guaranteed market returns. Instead of copying the GDP-race format, Groww could create simple reels like '3 big shifts shaping India's next decade' or 'Why young investors hear so much about India's growth story.' Use clean charts, plain language, source labels, and one takeaway per frame. Keep the tone educational and trustworthy: explain what a growing economy can mean, what it does not guarantee, and why diversification and patience still matter. Avoid jargon like 'demographic dividend' unless explained in everyday language.

INSTAGRAM CREATIVE INTELLIGENCE

	bnail	44.85	11.7% ER	""War चल रहा है, geopolitical tension हाई है तो gold तो ऊपर जाना चाहिए था, लेकिन gold गिर रहा है... पर क्यों?"" Type: Contradiction hook anchored in a current market event: it opens by stating what the audience expects to happen, then immediately shows the opposite is happening. STRATEGIC INTERPRETATION Creatively, the reel worked at the engagement level because it began with a strong market contradiction, used a timely geopolitical/inflation context, quantified the fall in gold and silver, and then decoded the hidden variable in simple Hinglish. The strongest mechanism is the reversal of a familiar investing rule: safe haven does not always mean price goes up when interest rates change the opportunity cost. The high engagement rate and near-equal comments-to-likes ratio indicate the idea sparked active response, but the low relative views of 0.45x suggests the format may have been too long, dense, or niche for broad distribution. Transcript and frames were available and analyzed; comment content was not available, so comment interpretation remains inferred from count and topic only.  BRAND IMPLICATION Groww can adapt the pattern by creating beginner-friendly "When common investing rules fail" explainers. Instead of copying the gold-war setup, Groww could pick timely contradictions relevant to young Indian investors: why markets rise after bad news, why SIP returns look negative despite discipline, why FD rates affect stock valuations, or why crude oil impacts everyday inflation. Keep the tone simpler than the reference: fewer global macro layers per reel, more Indian examples, one central visual analogy, and a balanced ending with "what to watch" rather than "what to buy." Avoid aggressive CTAs and heavy jargon; use plain-language chains like "if X becomes expensive, Y changes, so Z feels pressure."
	@zerodhaonline	34.44	6.5k 6.4% ER	CREATIVE HOOK ""If you're an active trader, you've probably noticed how quickly your positions list can get cluttered."" Type: Pain-point recognition hook aimed at a specific existing user segment STRATEGIC INTERPRETATION The reel likely overperformed relative to the account baseline because it solved a concrete, high-frequency workflow problem for a narrow but valuable user segment. Relative views were 1.48x and engagement rate was 6.39%, suggesting the content had stronger relevance than a generic announcement. The creative mechanism is clear: start with a real pain point, show the exact app screen where the problem occurs, introduce the new feature, then demonstrate multiple use cases with visible UI proof. The repeated phone mockups make the benefit tangible, while the presenter adds trust and reduces the coldness of a pure screen recording. What is known: transcript and 20 frames confirm a detailed product walkthrough with strong app visibility. What is uncertain: comment sentiment and save/share behavior are unavailable, so the exact engagement motivation cannot be proven.  BRAND IMPLICATION Groww can adapt the underlying pattern by turning app features into beginner-friendly "Here's how to avoid confusion" explainers, but should simplify the language for young Indian retail investors and avoid trader-heavy complexity unless the feature specifically targets traders. Instead of copying position grouping, Groww could choose a common beginner pain point such as understanding portfolio returns, tracking SIPs, reading order status, setting up alerts, viewing capital gains, or finding statements. The structure should be: name the everyday confusion, show the exact place in the Groww app, explain in plain English what the feature helps with, demonstrate 2-3 taps, and end with a reassurance rather than an aggressive CTA. Use simple labels like "Where your money went," "What changed today," or "How to check this before you invest," and avoid dense F&O terminology unless necessary.

INSTAGRAM CREATIVE INTELLIGENCE

Thumbnail

31.91

4.9% ER

""When your portfolio decides to join the trend""

Type: Relatable scenario hook with personification

STRATEGIC INTERPRETATION

The reel uses a simple investor-insight mechanic: personify the portfolio as a chaotic trend-chaser. This makes a common investing behavior instantly recognizable without requiring financial knowledge. The caption reinforces the same joke — "My portfolio doesn't follow trends. It chases them at full speed" — which sharpens the self-aware humor. The visual costume exaggeration creates thumb-stopping oddness, while the stock-chart laptop anchors the scene in investing. Performance is modest: 2,560 views, 0.68x relative views, and 4.92% engagement rate with only 3 comments. This suggests the idea was relatable enough for light engagement but may not have had enough novelty, informational value, or comment-worthy tension to travel widely. Transcript and later frames are mostly unavailable, so the exact payoff and retention pattern are uncertain.

✓

BRAND IMPLICATION

Groww can adapt the underlying pattern — turning common beginner investor mistakes into simple, self-aware moments — but should soften the chaotic trader energy and make it more beginner-friendly. Instead of showing a portfolio "chasing trends," Groww could show a calm contrast: what investors feel when everyone is talking about one stock versus what a simple plan reminds them to do. Keep the humor relatable, but add one useful takeaway in plain language, such as "trends can be noisy; your goals need not be." Avoid copying the costume, wording, or aggressive trading vibe. Use clean visuals, everyday Indian investor situations, and a reassuring tone that builds trust rather than glorifying impulsive behavior.

Content Pillar Strategy Framework

STRATEGIC PILLAR	AUDIENCE JOB-TO-BE-DONE	RECOMMENDED FORMATS
Finance made familiar: explain one investing concept at a time using everyday Indian situations, simple metaphors, and a clear takeaway.	Help me understand why the market is behaving differently than I expected, without using jargon.	• Creator-led skits • Simple analogy explainers • Text-on-screen hook + voiceover
Beginner myth-busting: calmly unpack common investing	Give me a simple checklist I can use to feel more confident about my next financial decision.	• Creator-led skits • Simple analogy explainers • Text-on-screen hook + voiceover

INTERNAL STRATEGY DOCUMENT6/11/2026

INSTAGRAM CREATIVE INTELLIGENCE

contradictions without jargon or market-timing advice.

Trustworthy market context: connect major economic or market trends to young investors using clean data, source labels, and balanced expectations.

Help me understand why the market is behaving differently than I expected, without using jargon.

- Creator-led skits
- Simple analogy explainers
- Text-on-screen hook + voiceover

App confidence and money clarity: show simple walkthroughs that help users understand portfolios, SIPs, statements, returns, alerts, and account actions.

Give me a simple checklist I can use to feel more confident about my next financial decision.

- Creator-led skits
- Simple analogy explainers
- Text-on-screen hook + voiceover

Investor behavior and emotions: create relatable, non-judgmental posts about FOMO, patience, confusion, volatility, and long-term discipline.

Help me understand why the market is behaving differently than I expected, without using jargon.

- Creator-led skits
- Simple analogy explainers
- Text-on-screen hook + voiceover

INSTAGRAM CREATIVE INTELLIGENCE

IMMEDIATE

 Simple Money Myth Series

Contradiction hooks are proven winners in this niche with low production overhead.

SUGGESTED EXPERIMENT

Test 3 'Myth vs Reality' scripts using talking-head + green screen format.

Effort: Low

Metric: 3-second hold rate & Saves

TEST-AND-LEARN

 Hinglish Office Skits

High shareability potential, but carries brand-tone risk if humor overwrites trust.

SUGGESTED EXPERIMENT

Produce 2 creator-led skits comparing 'Trader friend' vs 'SIP friend'.

Effort: Medium

Metric: Share rate & Comments

LONG-TERM

 Macro Explainer Animations

Builds deep institutional trust and captures high-intent audience looking for serious guidance.

SUGGESTED EXPERIMENT

Invest in 1 high-quality animated explainer per month on structural market topics.

Effort: High

Metric: Completion rate & Follows

INSTAGRAM CREATIVE INTELLIGENCE

Week 1: Strategy & Setup

Test 3 content buckets first: analogy explainers, contradiction explainers, and app walkthroughs. Publish 2 ideas from each bucket over 3-4 weeks to identify which pattern best fits Groww's audience.

Isolate the opening hook as the main creative variable. For each topic, test one Hinglish hook and one simple English hook; compare 3-second hold rate, average watch time, and saves.

Week 2: Production & Testing

Track saves and shares more heavily than likes for educational reels. A high save rate indicates the concept is useful; a high share rate indicates the analogy or humor is relatable.

For product-led walkthroughs, monitor comments mentioning confusion, feature names, or 'how to' questions. Turn recurring questions into a weekly 'Groww app basics' series.

Week 3: Distribution & Analysis

For analogy reels, keep one visual symbol per post. Test thali, umbrella, cricket, metro, and group project analogies, but do not mix multiple metaphors in the same reel.

Build a repeatable series from winners: 'Investing in Simple Examples,' 'When Markets Don't Behave As Expected,' 'Groww App in 3 Taps,' and 'Investor Habits We All Have.'

INSTAGRAM CREATIVE INTELLIGENCE

Use balanced compliance-safe endings. Avoid promises, stock-specific advice, urgency, or aggressive CTAs. End with practical prompts like ‘check your goal,’ ‘save for later,’ or ‘review calmly.’

Creative Briefs (Suggested Concepts)

Diversification Explained With a Thali

🕒 Pattern: Use a familiar daily object to simplify one investing principle

THE HOOK (FIRST 3S)

“Investing ka simple rule: poori thali sirf paneer se mat bharo.”

FORMAT

Creator-led short explainer with top-down food/thali visuals, simple labels on each bowl, and one clean takeaway card at the end; analogy-led and beginner-friendly.

TARGET DURATION

25-35 seconds

STRUCTURE

Hook on a thali visual -> show one plate with only one item labelled ‘only one stock/sector’ -> show balanced thali labelled ‘equity, debt, gold, cash’ -> explain that different parts help in different situations -> add one caveat: allocation depends on goals and risk comfort -> end with a simple recap frame: ‘Spread, don’t scatter.’

CALL TO ACTION (CTA)

Save this for the next time you review your portfolio mix.

⚠ BRAND SAFETY NOTE
Keep the tone calm and educational, not advisory. Avoid naming specific stocks or promising safety. Use Groww’s clean green-white visual style, minimal text, and friendly Hinglish. Make the analogy memorable but clarify that asset allocation is personal.

INSTAGRAM CREATIVE INTELLIGENCE

🕒 Pattern: Challenge a beginner assumption with a reassuring explanation

THE HOOK (FIRST 3S)

"SIP chal rahi hai... phir bhi returns negative? Iska matlab SIP fail ho gayi? Not really."

FORMAT

Creator-led talking-head with simple animated line chart and rupee icons; explainer-led with one central visual of monthly SIP dots buying at different prices.

TARGET DURATION

35-45 seconds

STRUCTURE

Hook -> show common belief: 'SIP = always positive returns?' -> show market going down while monthly investments continue -> explain in plain words: you are buying units at different prices, and short-term market movement can still affect current value -> show simple example with 3 months of buying -> takeaway: SIP is designed for discipline, not instant positive returns -> soft CTA.

CALL TO ACTION (CTA)

If you have a SIP, check the time period before judging the return.

⚠️ BRAND SAFETY NOTE

Very high fit for Groww's young investor audience. Avoid technical terms like XIRR unless separately explained. Keep reassuring but balanced: do not imply SIP guarantees returns. Use slow pacing and clear subtitles.

INSTAGRAM CREATIVE INTELLIGENCE

🎯 Pattern: Reflect a common investor habit through gentle humor, then add one calming takeaway

THE HOOK (FIRST 3S)

“POV: You invested for 5 years but check your portfolio every 5 minutes.”

FORMAT

Meme-led skit with one actor playing ‘Me’ and one phone notification character; simple home/office setup, exaggerated checking behavior, final calm text card.

TARGET DURATION

20-30 seconds

STRUCTURE

Hook -> actor opens app repeatedly during chai, metro, work call -> phone says ‘Nothing changed, bro’ -> pause moment: ‘Daily movement ≠ daily decision’ -> show simple reminder: review based on goals, not mood -> end with calm CTA.

CALL TO ACTION (CTA)

Share this with the friend who checks their portfolio more than WhatsApp.

 **BRAND SAFETY NOTE**

Make it relatable, not mocking. Keep humor soft and native to Indian young professionals. Avoid encouraging app overuse or panic. The lesson should be about patience and goal-based investing.

INSTAGRAM CREATIVE INTELLIGENCE

 Pattern: Connect a macro growth story to personal investing behavior with balance

THE HOOK (FIRST 3S)

"“India is young. But how does that matter for your investing journey?””

FORMAT

Data-led infographic reel using animated age pyramid, workplace/metro visuals, and source labels; story-led and proof-led.

TARGET DURATION

40-55 seconds

STRUCTURE

Hook -> show simple comparison: India has a large working-age population -> explain in everyday language: more earners can mean more consumption, savings, businesses, and opportunities -> add balanced frame: growth story does not mean every investment will go up -> takeaway: think long term, diversify, and avoid hype -> end with save prompt.

CALL TO ACTION (CTA)

Save this as a simple reminder: country growth and portfolio returns are connected, but not the same thing.

 BRAND SAFETY NOTE

Use clean data and cite sources on-screen. Avoid patriotic hype, return promises, or complex macro jargon. If using terms like 'demographics,' immediately explain them as 'more people in working age groups.'

INSTAGRAM CREATIVE INTELLIGENCE

🕒 Pattern: Solve a real app confusion with screen-based proof

THE HOOK (FIRST 3S)

““SIP debit ho gaya... but app mein check kahaan karna hai?””

FORMAT

Product-led screen recording with branded phone mockup, tap highlights, blurred personal data, and creator voiceover; proof-led demo.

TARGET DURATION

25-40 seconds

STRUCTURE

Hook -> show Groww home screen -> tap Mutual Funds/Investments -> open SIP section -> show where status, next instalment, and invested amount appear -> explain what each field means in one phrase -> end with reminder to verify details calmly.

CALL TO ACTION (CTA)

Save this for the next SIP date when you want to quickly check the status.

 **BRAND SAFETY NOTE**

Excellent trust-building format for Groww. Keep UI current and accurate. Avoid showing financial advice; focus only on navigation and understanding. Use simple labels like 'Next date,' 'Amount,' 'Status' instead of technical terms.

INSTAGRAM CREATIVE INTELLIGENCE

🌀 Pattern: Open with a contradiction and explain the missing variable simply

THE HOOK (FIRST 3S)

"*“Bad news aayi... phir bhi market upar? Yeh kaise?”*”

FORMAT

Creator-led explainer with one symbolic visual: a weighing scale labelled 'bad news' and 'expectations'; includes chart cutaway but no dense data.

TARGET DURATION

35-50 seconds

STRUCTURE

Hook -> state beginner belief: bad news should make markets fall -> introduce simple reason: markets often react to what was expected vs what actually happened -> give everyday example: exam was expected to be very hard, but paper was only moderately hard, so relief -> connect to markets: if bad news is less bad than feared, prices can rise -> takeaway: headlines and market moves don't always match directly.

CALL TO ACTION (CTA)

Next time you see a headline, ask: 'Was this already expected?'

 BRAND SAFETY NOTE

Avoid making it too trader-like. No stock calls, no timing advice. Use plain words and one analogy. Tone should be patient and confidence-building, not 'secret market trick.'

INSTAGRAM CREATIVE INTELLIGENCE

🎯 Pattern: Use one strong symbol to explain financial priority

THE HOOK (FIRST 3S)

"Investing without an emergency fund is like monsoon mein umbrella ke bina nikalna."

FORMAT

Text-led/creator-led reel with monsoon visuals:
person leaving home with and without umbrella;
simple animated labels for 'unexpected expense'
and 'investments'; analogy-led.

TARGET DURATION

25-35 seconds

STRUCTURE

Hook -> visual of sudden rain labelled 'medical bill/job gap/urgent repair' -> show person forced to break investment early -> show umbrella labelled 'emergency fund' -> explain: it helps you avoid disturbing long-term investments for sudden needs -> simple rule of thumb: keep a few months of expenses aside based on your situation -> CTA.

CALL TO ACTION (CTA)

Before your next investment, check if your emergency cushion is ready.

⚠️ BRAND SAFETY NOTE

Highly beginner-friendly and trust-building. Avoid rigid numbers unless framed as general education. Keep it non-judgmental and practical. This positions Groww as a responsible investing educator, not just a transaction app.

INSTAGRAM CREATIVE INTELLIGENCE

🕒 Pattern: Turn peer FOMO into a relatable skit with a useful pause rule

THE HOOK (FIRST 3S)

““Friend ne bola ‘yeh stock pakka chalega’... bas itna sunke buy karna?””

FORMAT

Skit-led creator video set in a cafe/office; two friends discussing a ‘hot stock’ without naming any real security; humor-led with final educational overlay.

TARGET DURATION

25-40 seconds

STRUCTURE

Hook -> friend confidently gives vague tip -> investor asks simple questions: ‘Business kya karta hai? Risk kya hai? Mere goal se match karta hai?’ -> friend has no answers -> final overlay: ‘Tip suno. Decision samajh ke lo.’ -> soft CTA.

CALL TO ACTION (CTA)

Send this to your investing group before the next ‘hot tip’ message.

 **BRAND SAFETY NOTE**

Avoid specific stock mentions and avoid sounding preachy. Keep the humor warm. Emphasize research, suitability, and patience in simple language. This should feel like Groww protecting beginners from impulsive decisions.

INSTAGRAM CREATIVE INTELLIGENCE

RECOMMENDED STRATEGIC DIRECTION

Groww should prioritize beginner-friendly, everyday-life investing education with soft humor and simple checklists. The strongest immediate opportunity is to build a repeatable 'Simple Money Myth' reel series that turns common investor confusion into save-worthy mental models. Avoid purely technical chart analysis, as competitors are already saturating that space with diminishing returns.
